

Software Team Member

Job Title: Software Team Member

Location: Camp Valdemar, Latvia, Adhazi

Employment Type: Full-time

1. What are we looking for?

We are seeking motivated and skilled software engineers to join our software development and maintenance team. As part of the team, you will play a key role in building and supporting high-quality software solutions. Your responsibilities will include:

- **Designing and Developing Software:** Work on both backend and frontend projects, contributing to scalable and maintainable software solutions.
- **Server-Side Development:** Set up and maintain a reliable Node.js server environment, ensuring optimal performance and security.
- **Mobile App Development:** Build applications for Android and/or iOS using Android Studio and Apple Developer tools. Experience with both platforms is a plus but not required.
- **User Interface Development:** Create responsive and intuitive user interfaces using EJS and CSS.
- **Database Development:** Design, implement, and manage databases using PostgreSQL, ensuring data integrity and efficient query performance.
- **Object-Oriented Programming (OOP):** Apply OOP principles and best practices in your development process. Basic knowledge is expected, with a willingness to learn more if needed.

2. Qualifications:

- Proven experience in software development, particularly with Node.js, mobile app development, and PostgreSQL.
- Strong understanding of OOP principles.
- Experience with UI development using EJS and CSS.
- Familiarity with Agile development methodologies.

- Ability to troubleshoot, debug, and optimize software applications.
- Excellent communication and teamwork skills.

If you are passionate about software engineering and eager to work in a dynamic team, we'd love to hear from you!
