PROJECT: EASYSHARE PLANNING & REQUIREMENTS DOCUMENTATION

1. Project Proposal

1.1. Project Name

EasyShare - Web-Based File Management System

1.2. Project Description

EasyShare is a modern, intuitive web-based file management system designed to help users efficiently manage, organize, and control access to digital files and folders. The system promotes productivity and collaboration through simplified folder management, visibility permissions, and a secure environment.

1.3. Objectives

- Provide an easy-to-use interface for managing files and folders.
- Enable granular visibility and access controls.
- Support secure login and authentication.
- Allow system administrators to restore deleted files.
- Offer help documentation for on-boarding and support.

1.4. Stakeholders

- End Users (General Users)
- System Administrators
- IT/Support Teams
- Development Team
- Project Managers

1.5. Timeline

- Planning & Design: 2 weeks

PROJECT: EASYSHARE PLANNING & REQUIREMENTS DOCUMENTATION

- Development: 6–8 weeks
- Testing & QA: 2 weeks
- Deployment: 1 week
- Total Duration: ~12 weeks

2. Business Requirements Document (BRD)

2.1. Business Problem

Organizations and teams need an efficient, intuitive system to manage large volumes of digital content securely while maintaining control over who can see and manage files.

2.2. Proposed Solution

EasyShare provides a centralized platform to:

- Organize files and folders.
- Control visibility and access levels.
- Search and retrieve digital content efficiently.
- Provide an administrative view for monitoring and restoring deleted content.

2.3. Key Features

- User authentication and session management.
- Folder operations: add, delete, search.
- File operations: upload, move, delete, restore (admin only).
- Visibility control: set public/private flags.
- Help documentation for users.

PROJECT: EASYSHARE PLANNING & REQUIREMENTS DOCUMENTATION

2.4. Success Metrics

- 95% user satisfaction score.
- <2 second file/folder search response time.
- <1% monthly error rate or system downtime.

3. Software Requirements Specification (SRS)

3.1. Introduction

3.1.1. Purpose

This document outlines the functional and non-functional requirements of the EasyShare file system.

3.1.2. Scope

The system will allow users to log in, manage folders/files, apply permissions, and view instructions. Admins will have access to deleted file recovery.

3.1.3. Definitions

- **Folder:** A container for organizing files or subfolders.
- **Visibility Permission:** Public/private flag applied to files/folders.
- **Admin:** A user with system-level privileges.

3.2. Functional Requirements

3.2.1. Login and Authentication

- Users must authenticate via username and password.
- Sessions should be securely managed with timeout controls.

PROJECT: EASYSHARE PLANNING & REQUIREMENTS DOCUMENTATION

3.2.2. Home Page Functions

- Folder Management
 - ❖ Add or delete folders.
 - ❖ Search folders by name.
 - ❖ Set visibility (public/private).
- File & Subfolder Management
 - ❖ Add/remove files and subfolders within a folder.
 - ❖ Move files/subfolders between folders.
 - ❖ Search files and subfolders by name.
 - ❖ Set visibility for files and subfolders.
- Deleted File Recovery (Admin only)
 - ❖ View a list of deleted files.
 - ❖ Restore previously deleted files.

3.2.3. Help Page

- Provide simple, step-by-step usage instructions.
- Include search capability within help content (optional).

3.3. Non-Functional Requirements

- Security

PROJECT: EASYSHARE PLANNING & REQUIREMENTS DOCUMENTATION

- ❖ HTTPS encryption
- ❖ Input sanitization to prevent injection
- ❖ Role-based access control
- Performance
 - ❖ Load time for any page: < 2 seconds
 - ❖ File search: < 1 second for <1000 items
- Usability
 - ❖ Clean, minimal UI with Bootstrap 5
 - ❖ Compatible with Chrome, Firefox, Safari, and Edge
- Scalability
 - ❖ Support for growing number of users and files

PROJECT: EASYSHARE PLANNING & REQUIREMENTS DOCUMENTATION

4. Use Cases

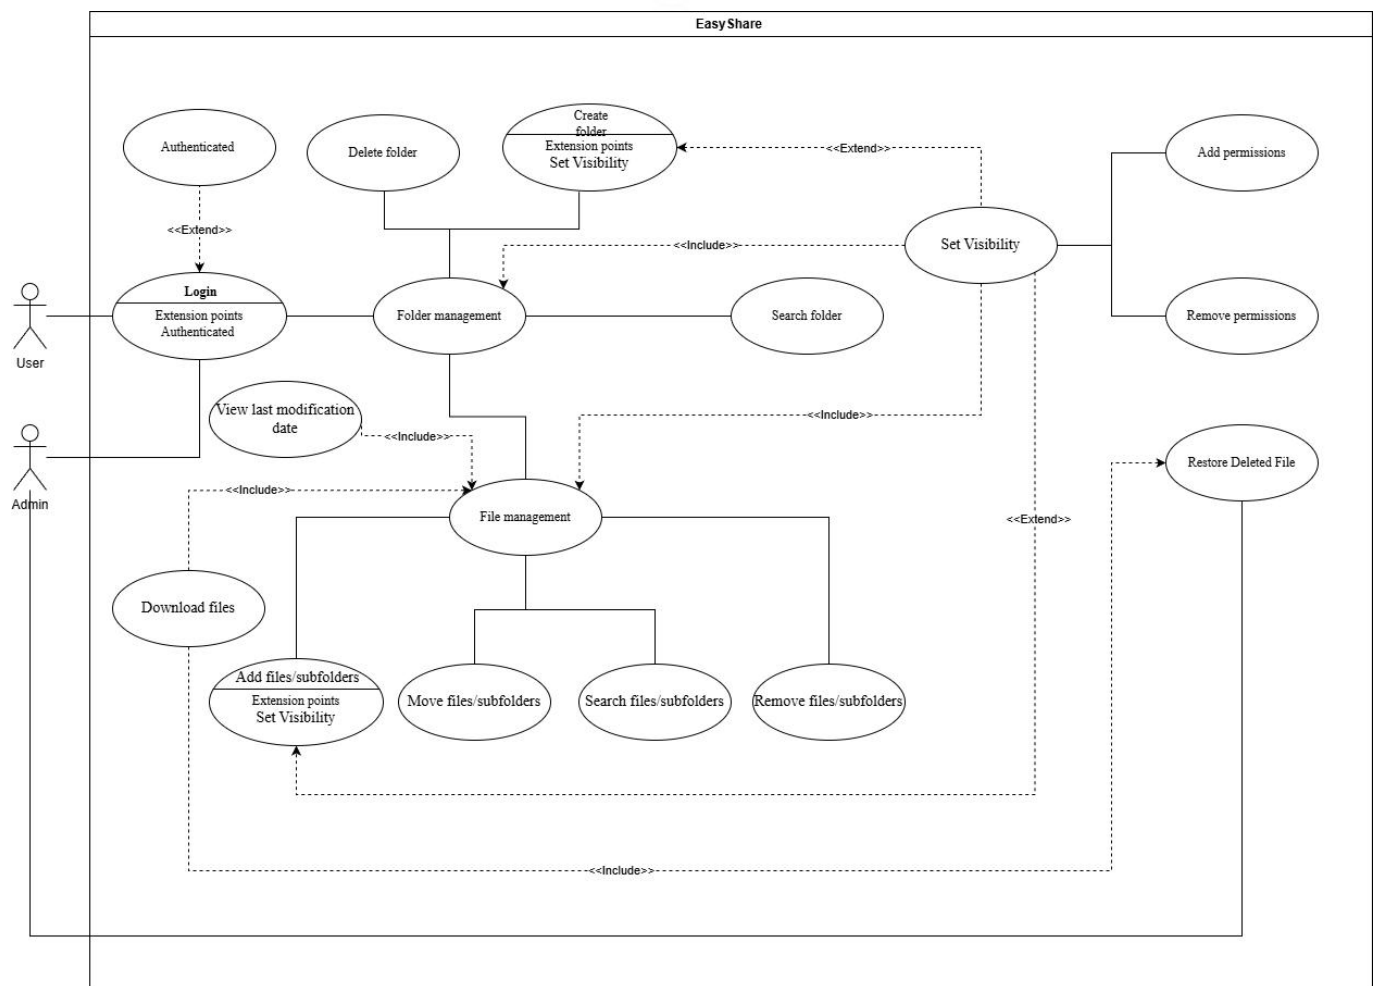

Diagram 1: Use case diagram

4.1. Use Case 1: Login

- **Actor:** User
- **Goal:** Log in to access the file system
- **Success:** User is authenticated and redirected to the home page

PROJECT: EASYSHARE PLANNING & REQUIREMENTS DOCUMENTATION

4.2. Use Case 2: Add Folder

- **Actor:** User
- **Goal:** Create a new folder
- **Success:** Folder appears in the list with appropriate permissions

4.3. Use Case 3: Set Visibility

- **Actor:** User/Admin
- **Goal:** Change visibility of a file or folder
- **Success:** Visibility setting is updated in the system

4.4. Use Case 4: Restore Deleted File

- **Actor:** Admin
- **Goal:** View and restore deleted files
- **Success:** Deleted file is restored and made available again

5. System Requirements Specification

5.1. Software

- Node.js backend with Express
- PostgreSQL or MongoDB for data storage
- Frontend with EJS and Bootstrap 5
- Multer for file uploads

PROJECT: EASYSHARE PLANNING & REQUIREMENTS DOCUMENTATION

5.2. Hardware

- Server with minimum:
- 4 GB RAM
- 2 vCPU
- 100 GB SSD Storage
